EDUCATION

EXPERIENCE

2019-

WEB DEVELOPER - FREELANCE
Grand Rapids, MI
I take a client's vision and see it through via software developing, social engineering, web design, and various other open source tools provided to developers.

Accomplishments:
- I am able to take an idea and develop it from a blank workspace. From HTML to running an Apache server. I have experience launching and maintaining live code.
- I have monitored web traffic and user data then produced readable graphics to communicate user and performance data clearly.
- I understand the fast pace a sprint can require and am comfortable coding under pressured deadlines.

2018-

WEBMASTER – PREVENT SUICIDE OXFORD
Oxford, MI
In collaboration with two former teachers, I helped set up the tech for a live stream of a charity event. I advertised, moderated, and created a webpage that was able to reach over 300,000 people in a span of 5 hours.

Accomplishments:
- I oversee and am responsible for all legal and financial processes.
- I recruited, interviewed, and selected board members.
- I communicate regularly with a board that meets entirely remotely. I found this efficient due to members being located throughout the US.

2017-

CHEMISTRY/MATH	FULLSTACK FLEX
Grand Valley State University	THINKFUL DETROIT
